Education

Business Intelligence Systems Infrastructure (Co-op), Algonquin College Ottawa, ON Jan. 2026 – Present

- Dean's Honor List; GPA 3.6/4.0
- Relevant Coursework: Business Intelligence programming, Database Analytics, Machine Learning, Data Visualization, AWS Cloud development, Data engineering

Bachelor of Management Information Systems, Kabul University, Afghanistan Completed Dec 2019

- Grade B, GPA 3.0/4.0
- Total 142 undergraduate Semester Credit focused on management information systems, business, and technology

Program-Related Skills

Programming: SQL, Python, R, HTML

Query Languages & Databases: SQL, SQL Server, MySQL

Data Visualization & BI Tools: Power BI, Tableau, Cognos Analytics

Databases: SQL Server, MySQL, Relational Databases (RDBMS)

Tools & Platforms: Jupyter Notebook, Power Query, Git, GitHub, AWS, Alteryx

Core Skills: Data Analysis, Data Transformation, Dashboard Development, Data Visualization, Reporting & Insights, Data Cleaning, Data Validation, Database Management

Professional Skills: Analytical Thinking, Problem Solving, Team Collaboration, Communication, Adaptability, Continuous Learning

Academic Projects

Hospital Database Analytics

Apr. 2026

SQL & Power BI Project | Algonquin College

- Designed a relational healthcare database and analyzed operational data using SQL.
- Developed Power BI dashboards to monitor appointments, revenue, utilization, and performance metrics.
- Applied data modeling, reporting, and business intelligence techniques to support decision making.

Academic Projects

Student Performance Analytics Dashboard

Mar. 2026

Power BI Dashboard Project | Algonquin College

- Transformed and modeled student performance data using Excel, Power Query, and Power BI.
- Built interactive dashboards to analyze academic performance, lifestyle factors, and student behaviors.
- Applied data normalization concepts and created relationships between multiple tables for reporting.
- Designed visual reports and KPIs to support data storytelling and analysis.

Hypertension Risk Prediction Using Machine Learning

Mar. 2026

Machine Learning Project | Algonquin College

- Analyzed Canadian Community Health Survey (CCHS) data to identify hypertension risk factors.
- Performed data cleaning, preprocessing, and feature selection using Python and pandas.
- Developed and evaluated classification models including Logistic Regression, Decision Tree, and Random Forest.
- Selected a balanced Random Forest model based on classification performance and recall.

Work Experience

Administrative Assistant, Da Afghanistan Breshna Sherkat, Kabul, Afghanistan

Mar. 2021 – Aug. 2021

- Prepared monthly operational reports of completed and ongoing projects to support management decision making.
- Performed high volume data entry and validation with strong attention to accuracy and consistency.
- Cleaned, organized, and track project records using Microsoft Excel.
- Coordinated documentation and communication between internal departments.

Certifications

- | | |
|---|-----------|
| • LinkedIn certificate: Data Analytics Core Knowledge | Mar. 2026 |
| • Microsoft Azure AI Fundamentals (AI-900) | Jul. 2025 |
| • IBM data analytics Certificate | Jun. 2025 |
| • Google Data Analytics Professional Certificate | Feb. 2025 |
